

ANKER-4E
PORTABLE COMBINED SURVEY DETECTOR

GENERAL PURPOSE:

detection of various timing devices: mechanical, electromechanical, electronic, as well as other electronic devices and gears by their electric, magnetic, acoustic and vibrating emissions

DETECTS:

- ▲ electromechanical timing devices at an up to 40cm range
- ▲ electronic timing devices at an up to 10cm range
- ▲ radio signal receivers at an up to 15cm range

APPLICATION:

- ▲ checking suspicious objects for the presence of explosive devices with clock delays or radio control receivers
- ▲ checking luggage and hand luggage

ADVANTAGES:

- ▲ compact, easy-to-handle design
- ▲ high sensitivity
- ▲ safe in use
- ▲ can be used in places where active radio-electronic equipment is not permitted

TECHNICAL PARAMETERS ANKER-4E

Indication	headphones
Power supply	4 x AA cell
Continuous operation time	not less than 30h
Dimensions (length/diameter)	510mm / 34mm
Operational temperature range	+5°C...+40°C
Weight (ready for operational / in standard packing)	0.7kg / 2.7kg
